March 2024

Saudi Chartbook

Summary

Real Economy: The non-oil PMI bounced back in February, following the lowest reading for two years in January. Both output and new orders accelerated, month-on-month, as demand remained very firm and supply bottlenecks showed some signs of easing. Meanwhile, cement sales saw their first yearly rise in six months in January.

Consumer Spending: Total consumer spending rose by almost 9 percent year-on-year in January, the highest rise in seven months, with a monthly gain of 0.6 percent. Looking at POS transactions by sector, almost all sectors gained during the month, with only 'electronics' declining.

SAMA Foreign Reserve Assets: SAMA's FX reserves rose in January by \$2.1 billion, to reach \$439 billion. The monthly increase came from both bank deposits, which were up by \$1.2 billion, and foreign securities, which rose by \$1.1 billion. The country's holdings with the IMF fell a little.

Money Supply, Bank Deposits and Credit: The broad measure of money supply (M3) rose by 10 percent year-on-year in January, with a monthly gain of 1.3 percent. Total deposits rose by 10 percent year-on-year, with demand deposits rebounding by 1.4 percent. New mortgages were down by 10 percent year-on-year, despite a 20 percent monthly gain.

Inflation: Consumer prices rose by 1.6 percent year-on-year in January, and by 0.3 percent month-on-month. Within the CPI basket, 'Food and beverages' and 'Restaurants and hotels' continued trending upwards. By contrast, 'Transport' has been in a down trend in recent months, pulled lower by falling car prices.

Real Estate Q4 2023: Real estate prices rose by 0.2 percent, year-on-year in Q4 2023, and by a marginal 0.1 percent quarter-on-quarter, giving an annual rise of just 0.7 percent, down from 1.1 percent growth in 2022.

Oil: Oil prices have been trading in a tight range over the past month. The impact of Red Sea shipping disruption has been largely indirect, with foreign buyers looking to US crude in a bid to bypass the Red Sea. Elsewhere, Chinese travel during the lunar New Year appears to have been robust. However, traders are still concerned that gains from non-OPEC Plus production—especially from US shale—will see markets soften in due course. In fact, we expect US shale oil growth to weaken this year.

Stock Market: TASI rebounded in February on a month-onmonth basis, up by 7.1 percent, in line with most regional and global markets, as inflationary pressures in the US continued to ease. Average daily trading volumes maintained its upward trend.

Real Economy

The non-oil PMI bounced back in February, following the lowest reading for two years in January. Both output and new orders accelerated, month-on-month, with demand extremely firm and some signs of supply bottlenecks easing. Meanwhile, cement sales saw their first yearly rise in six months, up by 4.7 percent year-on-year and by 4.2 percent month-on-month in January. Also, latest available data show non-oil exports rebounding in December, up by 12 percent year-on-year.

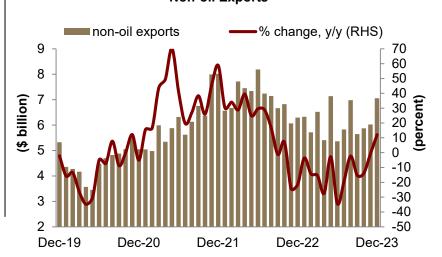

Non-oil Purchasing Managers' Index

(year-on-year change)

Non-oil Exports

The non-oil PMI recovered to 57.2 in February.
Demand remains very strong, and there are signs that supply bottlenecks and cost pressures might be softening, at least a bit.

Cement sales saw their first yearly rise in six months, up by 4.7 percent year-on-year and by 4.2 percent monthon-month in January.

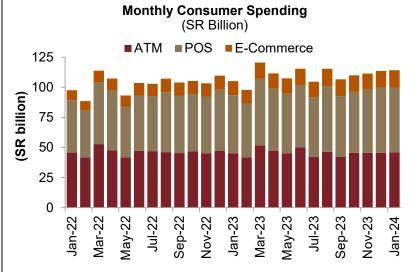

Also, latest available data show non-oil exports rebounding in December, up by 12 percent year-on-year, as petrochemicals exports saw their first yearly rise in 14 months, up by 5.5 percent year-on-year. More recent data from the PMI show non-oil export orders recovering somewhat in February.

Consumer Spending

Total consumer spending rose by almost 9 percent year-on-year in January, the sharpest gain for seven months, with a monthly rise of 0.6 percent. Cash withdrawals rose by 2 percent year-on-year, and POS transactions increased by 11 percent. Looking at POS transactions by sector, almost all sectors gained during the month, with only 'electronics' declining.

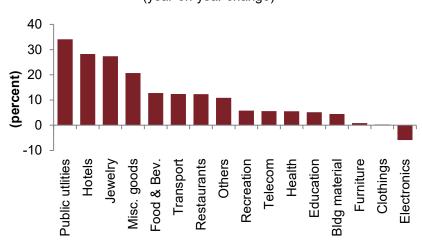

Total consumer spending rose by almost 9 percent year-on-year in January, the sharpest gain in seven months.

POS Transactions by Sector in January (year-on-year change)

Cash withdrawals rose by 2 percent year-on-year, and POS transactions increased by 11 percent.

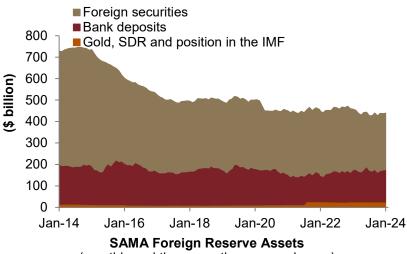

Looking at POS transactions by sector, almost all sectors gained during the month, with only 'electronics' declining.

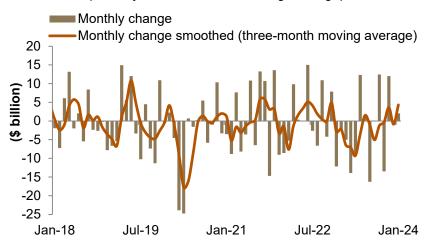

SAMA Foreign Reserve Assets

SAMA's FX reserves rose in January by \$2.1 billion, to reach \$439 billion. The monthly increase came from both bank deposits, which were up by \$1.2 billion, and foreign securities, which rose by \$1.1 billion (there was a slight downward adjustment to the country's holdings with the IMF).

SAMA Total Foreign Reserve Assets

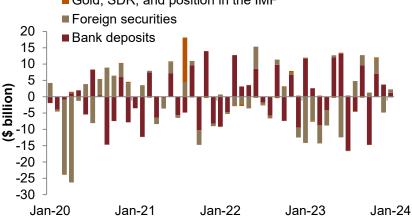

(monthly and three-month average change)

SAMA Foreign Reserve Assets (month-on-month change)

■ Gold, SDR, and position in the IMF

SAMA's FX reserves rose in January by \$2.1 billion...

...to stand at \$439 billion.

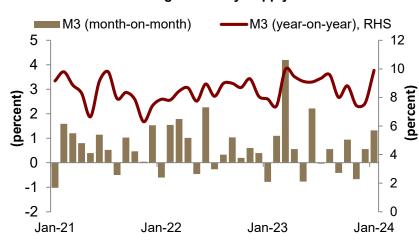

The monthly increase came from both bank deposits, which were up by \$1.2 billion, and foreign securities, which rose by \$1.1 billion. A partial offset came from a slight downward adjustment to the country's IMF holdings.

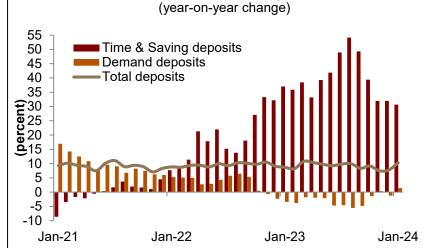

Money Supply, Bank Deposits and Credit

The broad measure of money supply (M3) rose by 10 percent year-on-year in January, with a monthly gain of 1.3 percent. Total deposits rose by 10 percent year-on-year, with demand deposits rebounding by 1.4 percent. New mortgages were down by 10 percent year-on-year, despite a 20 percent monthly gain that pushed the value of new mortgages to its highest level for 12 months.

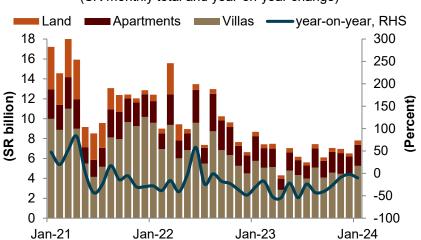

Change in Money Supply

Breakdown of Total Deposits

Residential New Mortgages by Banks and Finance Companies (SR monthly total and year-on-year change)

M3 rose by 10 percent year -on-year in January, with a monthly gain of 1.3 percent.

Total deposits rose by 10 percent year-on-year, with demand deposits rebounding by 1.4 percent.

New mortgages were down by 10 percent year-on-year, despite a monthly gain of 20 percent. This saw the value of new mortgages rise to SR7.8 billion—the highest level for 12 months.

Inflation

Consumer prices rose by 1.6 percent year-on-year in January, and by 0.3 percent month-on-month. Within the CPI basket, 'Food and beverages' and 'Restaurants and hotels' continued trending upwards. By contrast, 'Transport' has been in a down trend in recent months, pulled lower by falling car prices. Meanwhile, the price of diesel jumped in January, following an upward adjustment to regulated prices.

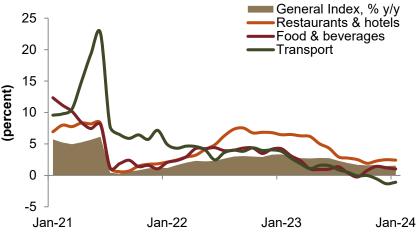

Inflation

(year-on-year change)

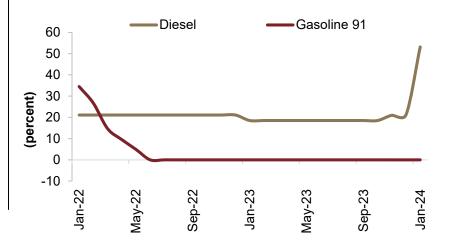

Other sub-groups contribution (ppt)
Food & beverages contribution (ppt)
Transport contribution (ppt)
Housing & utilities contribution (ppt)
General Index, % y/y

Inflation Rates in Selected CPI Basket Groups (year-on-year change)

Inflation Rates in Selected 'Transport' Sub-Group Items (year-on-year change)

Consumer prices rose by 1.6 percent year-on-year in January, and by 0.3 percent month-on-month.

Within the CPI basket, 'Food and beverages' and 'Restaurants and hotels' both continued trending upwards. By contrast, 'Transport' has been in a down trend in recent months, pulled lower by falling car prices

Meanwhile, the price of diesel jumped in January, following an upward adjustment to regulated prices. Diesel has only a small weighting in the consumer price index, but there may be some spillovers to other sectors of the economy, most notably Transport and Trade.

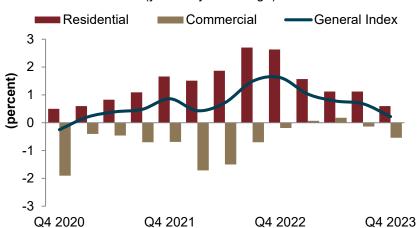

Real Estate Q4 2023

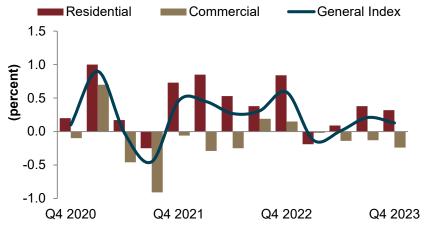

Real estate prices rose by 0.2 percent, year-on-year in Q4 2023, and by a marginal 0.1 percent quarter-on-quarter, giving an annual rise of just 0.7 percent, down from 1.1 percent growth in 2022. Residential real estate continued to rise, but by just 1.1 percent compared with 2.2 percent in 2022. The decline in commercial real estate prices softened to -0.1 percent in 2023, compared with -1 percent in 2022.

Real Estate Price Index by Type

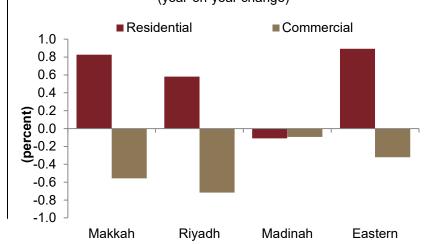

(year-on-year change)

Real Estate Price Index by Type (quarter-on-quarter change)

Real Estate Prices by Region (year-on-year change)

Real estate prices rose by 0.2 percent, year-on-year in Q4 2023...

...and by a marginal 0.1 percent quarter-on-quarter.

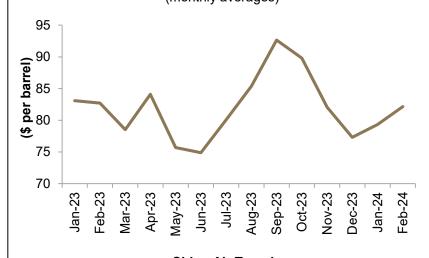

Regionally, residential real estate prices in the Eastern Region saw the highest rise.

Oil

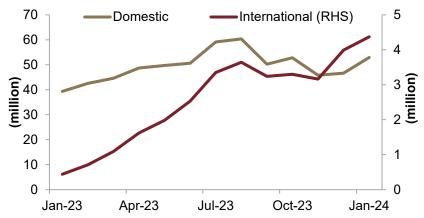

Oil prices have been trading in a tight range over the past month. The impact of Red Sea shipping disruption has been largely indirect, with foreign buyers looking to US crude in a bid to bypass the Red Sea. Elsewhere, Chinese travel during the lunar New Year appears to have been robust. However, traders are still concerned that gains from non-OPEC Plus production—especially from US shale—will see markets soften in due course. In early March, OPEC Plus decided to extend its production cuts until end Q2, as was widely expected.

Dislocations from the Red Sea disruption are being felt largely in European and US markets. European refiners are eager for US crude, while US refiners are ramping up activity again following a very cold January. Brent Oil Price (monthly averages)

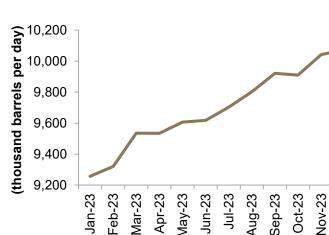

East Asian demand is also reasonably robust. In China, there was a surge in air travel during the lunar New Year, particularly for overseas trips.

US Shale Output

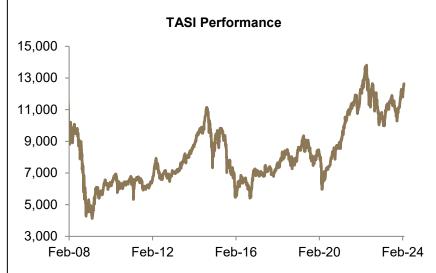

OPEC Plus production discipline has been better than expected, though traders are more focused on non-OPEC supply, principally from the US. We see US output continuing to grow but at a slowing rate as the impact of consolidation is felt and good acreage in the Permian basin becomes increasingly scarce.

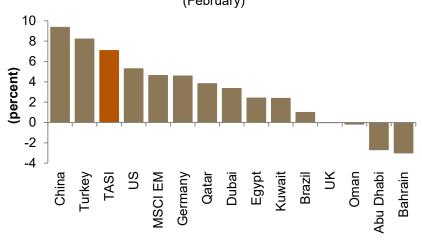

Stock Market

TASI rebounded in February on a month-on-month basis, up by 7.1 percent, in line with most regional and global markets, as inflationary pressures in the US continued to ease. Average daily trading volumes maintained its upward trend.
